To achieve new heights of success by working in a challenging environment and exploring my knowledge and skills and help in the organization's growth.

SKILLS

- Reactjs
- Html
- Css
- Bootstrap
- Tailwind
- Javascript
- Postgres
- TypeScript
- Golang
- MySQL

EXPERIENCE

Frontend Developer, Sas proaplicaciones, December 2022-November 2023

COLOMBIA

- I worked as a Frontend Developer for a US-based client on a contractual basis for two projects. In the first project, we utilized ReactJS for the frontend, Ruby on Rails for the backend, and Docker for the database. My responsibilities included creating pages using ReactJS, integrating APIs written in Ruby on Rails with the frontend, and collaborating with the backend team.
- I reviewed the code, paired with colleagues, and led testing.
- I created a chatbot UI using Ruby on Rails that allowed users to ask questions and receive data answers in a tabular format. My role was to design and implement the system to integrate with the existing backend infrastructure. The project was executed with high quality and efficiency, and the final product was well-received.

Full Stack Developer, Sas proaplicaciones, December 2021-December 2022

Bogota, COLOMBIA

- I worked on an existing website called **Colman** (<http://colman.com.co/>), which is used by the Colombian Government for purchasing tanks. My main responsibilities were to add new features to the website, develop and implement designs, and use MySQL to store the data in the database. I also used that data to generate the MD files, which are used by the Hugo template.

Technologies used: I used various technologies to complete this project, including Golang, Hugo, and MySQL. Golang is a programming language that is known for its concurrency and speed, while Hugo is a static site generator that is used to create websites quickly. MySQL is a popular database management system.

FrontEnd Developer, Tutree, December 2019-January 2021

Noida, India

- Tutree (<https://tutree.com/>): Maintained web and software, added new features, resolved bugs using programming languages like Javascript, ReactJs. Installed, configured, and maintained web and software.
- Developed and maintained user-facing webpages using HTML, CSS, JavaScript, and ReactJs.
- Created custom responsive designs that optimized the website layout for various devices.
- Debugged existing code to identify and fix bugs or performance issues.
- Optimized application for maximum speed and scalability by utilizing best practices such as minification, caching techniques.

EDUCATION AND TRAINING

Master of Computer Application

Dev Bhoomi Uttarakhand University, Dehradun(Uttarakhand) January 2022

Bachelor of Computer Application

Gjust University, Hisar(Haryana) January 2019
