

Jyoti Tewari

3.1 Years Experience

Email - tiwarij657@gmail.com

Contact – 8587973942

SUMMARY

- 3.2+ years of experience as Front-end developer
- Experience with current technologies to build modern, functional, responsive web clients using React
- Experience in integrating the data with React.js using Redux Framework architecture
- Experience in using React.js components, Forms, Event, Keys, React Router and Redux concepts
- Worked on state, props and events to create interactive React components
- Experience in Express.js
- Extensive experience in designing CSS templates for use in all the pages on the website working with CSS Background, positioning, text, border, margin and table
- Expert knowledge of modern HTML5 and CSS frameworks and at least one framework such as Bootstrap, SCSS, Material UI, Tailwind CSS
- Good Knowledge with GitHub and bitbucket for Code Management and Version Control

EXPERIENCE

- Experience in Software lifecycle: Requirements Gathering, Breakdown, Design, Implementation, Quality Assurance, Documentation, Support, Maintenance
- Experience in using bug tracking and Project Management tools like JIRA
- Experience in implementing Component life cycle architecture, store actions, using socket.io in React-Redux app to handle real time data, installing React Router, Thunk Redux for API calls in React.js
- Experience in developing Single Page Applications(SPA) using JavaScript MVC framework
- Experience in connecting for progress checkin and suggestions sessions with the various team involved in the project like UI/UX team, QA team & Internal Team
- Good experience in Functional, Class and Pure Components, Memo and Context APIs

EDUCATION

- Master in Computer Application

CORE SKILLS

Operating System: Linux, Windows

Database: Postgres, MySql

Programming Languages: JavaScript Frameworks:

React.js, Redux, Express js, Nest js, TypeScript

Javascript Libraries: ApexChart

Version Control Tools: GitHub, GitLab

- Worked on dynamic client-side JavaScript codes to build web forms and simulate process for web application, page navigation and form validation
- Experience in implementing AJAX based application by fetching the response from backend REST API as a part of JSON
- Worked with Solution Architects in order to understand client's needs and help develop meaningful solutions
- Experience in End-to-end understanding of development processes, organization, and techniques in order to drive the creation of optimal solutions
- Experience in Applying optimization technologies to reduce size, and load times to enhance user experience

SAS Proaplicaciones - Dec'21 - Dec'23

PROJECTS

Project 01

Project Overview: It is a ChatBot AI that allowed users to ask questions and receive data answers in a tabular format

Tools & Technologies used: React.js, CSS, Postgres, Github, Material UI

Project 02

Project Overview : it's a stock donation platform which is used to donate the stocks.

Tools & Technologies used: React.js, MySql, Github, Redux, Tailwind CSS

Project 03

Project Overview: it's an E-commerce platform through which you can purchase boat, life jacket and water tank.

Tools & Technologies used: HTML5, CSS, JS, React.js, Github, MySQL.

ROLES & RESPONSIBILITIES

- Embed design layouts and wireframes directly into the app's coding structure.
 - Enhance components for uniform functionality on various browsers and devices.
 - Implement front-end API connections utilizing React.js.
 - Develop the app's user interface using JavaScript coding.
 - Build web interfaces that are responsive and adaptable to different screen sizes.
 - Construct tools and libraries for data visualization, along with code that can be reused for future projects.
-

Tutree - Jan'20- Nov'20

PROJECTS

Project Overview: It's an application where the student will hire a tutor to understand any concept for a specific time, and another website for the job seeker person where job is posted.

Tools & Technologies used: HTML5, CSS, JS, ReactJs, GitLab.

ROLES & RESPONSIBILITIES

- Maintained web and software, added new features, resolved bugs. Installed, configured, and maintained web and software.
- Developed and maintained user-facing webpages using HTML, CSS, JavaScript, and ReactJs.
- Created custom responsive designs that optimized the website layout for various devices.
- Debugged existing code to identify and fix bugs or performance issues.
- Optimized application for maximum speed and scalability by utilizing best practices such as minification, caching techniques
